

## Building Directories

With either Interactive Technology or Static Digital Displays, properties are making significant investments in facility upgrades and high-tech improvements to attract their targeted tenant audiences. Property managers are beginning to recognize the time savings that can be achieved by offering digital building directories, and understand the value of providing modern day amenities to modern day tenants.

Designed for use in office buildings but beneficial to multiple environments, our building directory software is much more than your typical digital directory. In addition to the standard tenant listing, you have the option to incorporate way-finding, showcase amenities, cafeteria menus, events, maps and more. Properties can also promote available office space and provide contact information on Building Management / Leasing. Requirements for the digital directory solution are internet and power.

### Features / Benefits

- Search by Company and/or Individuals
- Search Multiple Buildings
- Custom Design
- Building Events / Announcements
- Optional News & Weather Feeds
- Showcase Available Office Space
- Manage Data from any Computer
- Retrofit into your existing marquee
