

Lobby Displays

The Lobby Display is an all-in-one digital signage display with wireless networking capability. The technology device is plug-n-play with Remote Management Software. The Software allows you to administer the content and send updates to multiple locations from one central location. Eliminating clutter creates a clean and professional presence. With our lobby display solution, you will engage your audience without clutter and create a more visibly appealing environment.

The digital displays deliver quality video / image content in a compact frame. The sleek unit integrates the media player, high brightness display, expandable local storage and wireless network for easy placement. Since the power adapter is the only physical connection to the player, it's easy to achieve a clean and professional presentation in tight spaces. The solution is ideal for hospitality, banks, retail, and reception desks. Greet customers and promote your brand effectively and efficiently.
