

TouchQuest Concierge

TouchQuest Concierge (TQ-Concierge) is a custom touch screen application that offers visitors a self-service resource to access important travel related information and services. Whether using large LCD displays to greet visitors, announce events, offer flight information or marketing content; hotels are increasingly offering modern day amenities to distinguish themselves from competitive hotels in the area.

In the most recent wave of activity, hotels are rapidly investing in the deployment of interactive touch screens to create the ultimate traveler experience. With the emergence of touch screen platforms such as the IPAD and IPHONE, more and more visitors are becoming familiar with the use of touch screen applications. TQ-Concierge was developed to give end-users a similar experience to selecting Apps on his/her Smart Phone, accept TQ-Concierge services are specifically geared for a hotel environment. These services include weather, news, directions, maps, social media, e-postcards, internal marketing, restaurants, shopping, transportation, attractions, flight Information, property events, way-finding, QR codes and more.
